Education

Bachelor of Engineering (Electronics & Telecommunication Engineering) October 2021 – June 2025
Minor in Computer Engineering
Sardar Patel Institute of Technology **8.46 CGPA**

Higher Secondary Education (HSC - PCM)	Jun 2021	Secondary Education (ICSE)	Mar 2019
Pace Junior Science College	90%	Gokuldharm High School & Jr. College	97.5%

Technical Skills

Core Concepts: Data Structures & Algorithms, OOPs, Database management system, Data Analysis, Computer Communication Networking, AWS Cloud Basics.

Programming Languages Used: Java, JavaScript, C++, Kotlin, SQL, Python.

Libraries and Frameworks: React.js, Node.js, Express.js, Spring Boot, Spring Data JPA, pandas, CSS.

Databases: MongoDB, OracleDB, MySQL.

DevOps & Tools: GitHub, SVN, Postman, JIRA, VS Code, Eclipse IDE, MS Office.

AI Tools: Cline, Oracle Code Assist, Claude, Codex CLI, Gemini, Github Copilot.

Work Experience

Associate Consultant — Oracle **July 2025 – Present**

- Enhanced **Oracle Flexcube** core banking modules for **Hdfc Bank**, delivering regulatory and business-critical enhancements aligned with RBI compliance requirements.
- Developed and documented **Java and SQL-based backend** APIs for various modules like account creation, nominee addition and maintainance, passbook maintainance, CBR codes maintainance and limit inquiry.
- Implemented end to end validations in API for multiple Nominee functionality, CBR codes maintainance that were in line with the Bank application screens.
- Automated development workflows by creating an **AI-assisted prompt engineering solution**, leveraging full codebase context to accelerate implementation of inquiry and deletion features across multiple application screens.

Software Developer Intern — GNZY **Jan 2025 – July 2025**

- Engineered scalable UI components using **Kotlin & Coroutines** with pagination and lazy loading for enhanced performance.
- Developed **E-commerce features** like cart, wishlist, coupons, brand page integrated with a Node.js backend.
- Built cross-platform app using **React Native**, ensuring consistent user experience and performance.
- Designed **search, filtering and tutorial UX**, to enhance user engagement and retention.

Projects

VibraSense — C, Websockets, Arduino Ide

- Built a **WiFi-enabled assistive glove** using ESP32 for real-time Braille communication, securing **1st rank** in the Electronics department.
- Integrated **embedded systems and C firmware** for tactile feedback and efficient signal processing.
- Developed a web interface with AI-driven processing, leveraging **WebSockets** for real-time, character-by-character data streaming from frontend to ESP32.

Resume-Job Matching System — Python, streamlit, Node.js Github

- Developed an **AI-based resume-job matching system** using sentence embeddings for semantic similarity beyond keyword matching.
- Built and integrated a **Node.js** RESTful API for seamless frontend-backend communication.
- Designed an end-to-end system with **Streamlit UI** for real-time resume parsing and match score generation.
- Implemented **PDF parsing** and **NLP-based skill extraction** to identify key and missing competencies.

YelpCamp — React.js, Node.js, Express.js, MongoDB

- Developed full-stack campground platform with user-generated content, community engagement (reviews, likes), and responsive React.js frontend for seamless interactivity and performance.
- Designed RESTful APIs using Node.js, Express, MongoDB; implemented secure authentication/authorization with Passport.js for robust CRUD operations.
